

Management Team

Fumitake Kawasaki

CEO

Software researcher. With more than ten years of experience in the software business from various perspectives, from sales to research and development, the serverless framework "SOULs" developed to solve development issues has been certified as an advanced research and development project (WBSO) by the Dutch government. He is strong in the back-end, cloud infrastructure, and smart contract development, is also good at improving the efficiency of development work, and has invented many tools.

Date of Birth: 1985 / 8 / 28

Shota Kishi

Executive Vice President

Software researcher. he has been designing and developing software products for ten years. He has strengths in front-end development and can develop user-friendly UX multi-platform apps (PC, tablet, smartphone) with human-centered design. Since he participates in the back-end, cloud infrastructure, and smart contract development, he can design and develop applications while considering the overall balance. He is a contributor to Solana Labs.

Date of Birth: 1989 / 6 / 25
